## The process of your visit to the vaccination center Wolfsburg

### 1. Fever measurement

You will have a fever measurement immediately after entering the vaccination center. This is done contactless.

### 2. Front desk

Register here for your vaccination appointment.

### 3. Registry

Here you have to show your letter or email. You will then receive the information sheet for the vaccination and an anamnesis sheet that you have to fill out. Using the anamnesis sheet, the doctors responsible can assess whether your medical history allows for a vaccination. Tables and chairs are available for reading and completing the forms.

### 4. Medical consultation

Next, a doctor will have a brief preliminary talk with you and will discuss possible side effects of the vaccination and your anamnesis sheet.

### 5. Vaccination

You will be vaccinated in one of the vaccination booths. This only takes a few moments.

### 6. Rest area

After the vaccination, you will spend 15 minutes in the rest area.

**The entire visit to the vaccination center takes about 30 to 45 minutes.**
